Experience

Software Developer & Cybersecurity Intern May 2025 – Present
Hydro-Québec *Montreal, QC*

- Developed a secure pre-production infrastructure from the ground up to support PKI deployment and testing.
- Contributed to the design and implementation of the Public Key Infrastructure (PKI) used across enterprise Windows Server environments.
- Built an in-house C# WPF application to manage cryptographic keys and certificates stored on YubiKeys, improving internal key lifecycle management.
- Collaborated with the cybersecurity and infrastructure teams to validate reliability, automate certificate operations, and harden identity management systems.

Data Analyst Intern Sept 2024 – Dec 2024
Desjardins *Montreal, QC*

- Developed automated data integration workflows from Excel to BlueMatrix and MySQL to Power BI, streamlining reporting and reducing manual errors.
- Cleaned and corrected critical internal databases, enhancing data accuracy and reliability.

Education

Concordia University Sept 2023 – May 2027
Bachelor of Engineering – Software Engineering Co-op *Montreal, QC*

- Member of the Institute for Co-operative Education
- Relevant Courses: Data Structures and Algorithms, Object-Oriented Programming (Java I & II), Web Development, Principles of Programming Languages, Software Architecture, Software Requirement and Deployment, Software Management, Measurement and Quality Control
- University Soccer Player – Concordia Stingers

Projects

AquaScan (PolyHacks 2025 - 1st Place) | *React Native, TypeScript, Python, AI/ML* Jan 2025

- Developed an AI-powered mobile app that identifies fish species and checks real-time fishing regulations.
- Earned 1st place and $1,000 grand prize at PolyHacks 2025, Polytechnique Montréal.
- Optimized AI model performance, API management, and database structuring with a 4-person team.

LinkUp – Live Messaging Application | *React, JavaScript, Node.js, Agile* Jan 2025 – May 2025

- Implemented real-time messaging with WebSockets, private chats, and cross-platform support.
- Trained a BERT model for AI-powered toxicity detection to promote a safe user experience.

Home Lab Infrastructure | *Networking, DNS, NAS, Self-Hosting, Docker* Feb 2026 – Present

- Built and maintain a full home lab with DNS filtering, NAS storage, and a separate segmented home network.
- Self-host and manage multiple applications and services across the network.

Ethical Hacking | *TryHackMe, Hack The Box, OverTheWire* May 2025 – Present

- Practice offensive security fundamentals and CTF challenges on TryHackMe, Hack The Box, and OverTheWire.

Technical Skills

Languages: Java, Python, C#, JavaScript, SQL, HTML/CSS
Frameworks: React, Node.js, Spring Boot, WPF, Flask
Developer Tools: Git, Docker, Power BI, Jira, Confluence, Visual Studio, VS Code
Databases: MySQL, MongoDB
Platforms: Windows, Linux, macOS
